Director's Note

Last week a participant that graduated from ECO's Transitional Living Program stopped in to visit. I love when I get to share success stories! This person was part of the program for approximately one year. During that time they gained full time employment, purchased a car and moved into their own apartment. The participant is a first time car owner, is proud that they have a their license, and have the car registered and insured! For many of us these are simple things that happen on a regular basis. I am so proud of the work of Alyssa and crew that helps those we serve learn life skills that will continue to help them be successful!
